# Foam Cleaner

## SNEAKER CARE RANGE

**VOLUME :**  
115 ml

### TECHNICAL CHARACTERISTICS

Universal stain remover. Removes all kinds of dirt on any material, without danger for the most fragile. Its foam cleans deeply the dirt, stains, silicones, resins... The application of the cleaning foam does not change the nature of the leather or textile in any way. It does not make the surface of your sneaker drier or greasier, which will allow it to regain its new appearance and its original shine, while preserving its initial colour. This product, developed in collaboration with prestigious footwear brands, allows a surface and deep cleaning of the treated surfaces.

The cleaning agents in this exclusive formula are based on anionic surfactants. There is no need to classify the product as dangerous. Allows air shipping without any special procedure or declaration of dangerous product or particular constraint.

### CARE INSTRUCTIONS

1. Brush your item to remove dust and surface dirt.
2. Shake the product energetically.
3. Apply the foam to the entire shoe.
4. Leave the product on for two minutes.
5. Brush your sneaker again to remove the absorbed foam and dirt.
6. Scrub the brush on a different surface to remove the foam.
7. Repeat if necessary.
8. Leave to dry for 12 hours.

It is important to test on a hidden area first. The natural and non-aggressive formula will preserve the softness and original feel of your article.

You can then apply products from the Sneaker Care range to nourish and revive the colour of your sneakers. To avoid frequent cleaning, we recommend using the PROTECTOR, which will protect your sneakers from future exposure to water, stains, mud, dust, etc.

### FIELD OF USE

Universal: smooth leather, suede, nappa, nubuck, all textiles, microfibres, stretch, crepe, etc.
